Our client is one of the world's leading generics and specialty pharmaceutical companies, providing products to customers in approximately 140 countries and territories. The company maintains one of the industry's broadest and highest quality product portfolios, which is regularly bolstered by an innovative and robust product pipeline. With a workforce of more than 40,000, the company has attained leading positions in key international markets through its wide array of dosage forms and delivery systems, significant manufacturing capacity, global commercial scale and a committed focus on quality and customer service.

The new position of

Medical Science Liaison Manager (m/f)

is responsible for enhancing medical communication between Specialty, L.P. and therapeutic experts and researchers, support of clinical and outcomes research development, facilitate research site selection and study placement, and facilitate the development and receipt of investigator initiated research proposals. The Director, MSL will establish relationships with clinical and research leaders in their assigned region including, but not limited to, academicians, clinicians, directors of pharmacy and other health care professionals. The Director, MSL will collaborate with the respective Therapeutic Area Medical Director to assist in the execution of Medical Affairs Brand Strategy in their respective geography.

Major Duties of Position

- Engage in meaningful proactive and reactive peer-to-peer discussions with healthcare professionals regarding the respective disease state via scientific exchange.
- Develop strong relationships with emerging healthcare professionals, Key Opinion Leaders and key academic institutions and researchers.
- Provide information on new research directions, ideas, practices in patient care and identify unmet medical needs.
- Act as a liaison between National and Regional Thought Leaders and the company to extend the Medical Affairs brand strategy.
- Interact with Healthcare Professionals to develop educational materials (e.g. disease monographs, publications, slides) for educational purposes at academic centers or community-based programs.
- Support field operations through presentations of scientific exchange to targeted audiences
- Actively participate in Speaker Training, Advisory Boards, Round Table discussions, National and Regional Medical Conferences and internal committee meetings, as needed.
- Maintain a current knowledge of published literature in the respective therapeutic area of specialization as well as attend meetings and congresses sponsored by the influential leaders of the respective therapeutic area for educational purposes.
- Review, evaluate, and channel information to the appropriate personnel and provide timely responses to requests regarding product or disease information assuring that all activities and reporting methodologies are compliant with Company and Regional policies.
- Perform other duties as assigned.
