

Our client is a global enterprise with core competencies in the Life Science fields of health care and agriculture.

The new position of

Lead Engineer - Secondary Manufacturing Pharma (m/f/d)

will lead and coordinate the entire engineering processes of a specific sub-project in all project phases.

Major Duties of Position

- You are responsible for the master documents of the dedicated sub-project
- You define the sub-project scope and establish an appropriate cost and time control system to ensure the budget and schedule adherence
- You develop project-specific solutions, considering the specific standards and norms
- You are the Team leader (m/f/d) of your specific sub-project team
- You follow-up technical procedures and applications of best in class industry standards and ensure implementations of relevant best practices/lessons learned
- You keep up-to-date knowledge about relevant internal regulations and respect compliance policy/GMP regulations as well as safety at construction
- You report functionally directly to the project management in accordance with the project organization. As a lead engineer (m/f/d) with own project responsibility, you represent your project to the steering committee and other stakeholders

Who you are

- University or college degree (Master or Bachelor) in process engineering, mechanical engineering or similar with many years of experience in pharmaceutical or biopharmaceutical production processes
- Superior Communication skills, customer focus and ability to deal with ambiguity and conflict
- Knowledge and experience in the application of the necessary tools for project management
- Development of stand-alone solutions to complex issues with technical and non-technical challenges
- Successful handling of strong complexity in terms of stakeholders, conflict and Claims Management
- Coordination of multiple trades and different disciplines, with a good understanding of the interfaces
- Mobility and willingness to travel to support the global project implementation; preferably cross-cultural experiences and competencies
- Very good German and English skills; other language skills are of advantage

Do you feel attracted by this position? We kindly ask you to apply in full confidentiality in English, with resume and list of key competences.
